Work Experience

Full-Stack Software Engineer (Contract)

Jan 2026 – Present

Selected clients: MsMaryamsMath, Numerix

London, UK

- Shipped a TypeScript/Next.js mathematics learning platform for 150+ learners in 3 months, translating Figma designs into responsive learning, booking and account experiences through production.
- Built real-time operational dashboards for a 20-person logistics team, replacing 15-minute batch reports with live tracking using React/Next.js and Server-Sent Events.
- Built a conversational analytics experience enabling 20+ non-technical users to query operational data through natural-language and voice interfaces using React, Node.js, OpenAI and ElevenLabs.
- Improved frontend delivery from weekly to 10+ production releases per week through automated testing and Docker/GitHub Actions CI/CD.

Software Engineer

Aug 2023 – Jan 2026

School of Research Science - private K-12 school, in-house tech team

Dubai, UAE

- Built a TypeScript/Next.js assessment and analytics platform used by 1,000+ students, designing role-based workflows, automated marking and reporting interfaces that saved teachers around 3 hours per assessment cycle.
- Designed and delivered student and staff booking workflows for a platform processing 3,400+ bookings, handling loading, validation, error and concurrent-booking states across the React frontend and AWS backend.
- Worked directly with school leadership and teaching staff to turn operational requirements into user-facing product workflows, iterating on interfaces from staff feedback through production.
- Halved release cycles from 10 to 5 days across a 3-engineer team by introducing automated testing, CI/CD, code-review standards and canary deployments.

Software Engineer (Contract)

Jun 2020 – Aug 2023

Selected clients: SpotOnEnterprise, JohnCanary, SpreeClothing

London, UK

- Built a 30+ component React/Storybook design system with shared design tokens and accessibility defaults, reducing new-client UI build time by 30% and supporting 4 front-end engineers.
- Built and shipped customer-facing React commerce experiences across 3 client products, integrating Stripe payments and supporting more than 2,000 transactions per month.
- Developed responsive product interfaces from design through production, working across React, TypeScript, component architecture and API integration for multiple client engagements.
- Built shared Node.js API infrastructure with Redis, role-based access control and rate limiting to support frontend applications across 4 production products.

Software Engineer Intern

Aug 2019 – Dec 2019

Adaptive

London, UK

- Reduced analyst data-retrieval time from 10 to under 6 minutes per query by building Python/SQL ingestion pipelines for equities, FX and fixed-income data.

Education

King's College London

Sep 2017 – Jun 2020

Bachelor of Science in Computer Science - final-year project: distributed real-time data pipeline (Python)

London, UK

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL

Frontend & Testing: React, Next.js, Tailwind CSS, Storybook, Playwright, Jest, Vitest

Backend & Data: Node.js, Express, PostgreSQL, Redis, Apache Kafka

Cloud, DevOps: AWS (Lambda, API Gateway, EC2, S3, CloudWatch), Docker, GitHub Actions, Nginx
