

Ronnie Kiyegga

Full-Stack Engineer

London, UK | +44 7775 633768 | kiyeggaronnie@gmail.com | linkedin.com/in/ronniekiyegga | ronniekiyegga.com | github.com/BlissfulCoda

Full-Stack Software Engineer with **6 years** shipping production-grade SaaS and EdTech platforms spanning system architecture, AI integration, and CI/CD. Core stack: **TypeScript, Next.js, Node.js and PostgreSQL**. End-to-end engineer with a track record of owning architecture, cross-functional delivery, and shipping 6+ platforms from zero to production consistently on time.

EXPERIENCE

Freelance

London, UK

Product Engineer (Clients: EdTech & SaaS)

Jan 2026 – Present

- Architected and shipped 3 production SaaS platforms end-to-end each within a 6-week timeline using a Figma-first scoping process across Next.js, Node.js, and PostgreSQL on DigitalOcean, achieving zero critical post-launch bugs in the first 90 days.
- Reduced hotfix deployment time from **hours to under 15 minutes** by building containerised CI/CD pipelines (GitHub Actions, Docker) with full dev/staging/production environment parity.
- Designed a **dual-database architecture** (PostgreSQL + BigQuery) with Server-Sent Events for real-time dashboards, decoupling analytics from transactional load to enable independent scaling.
- Built a voice-driven NLP interface using the ElevenLabs API that reduced educator report generation time from ~3 minutes to under 10 seconds, enabling conversational queries over student performance data, validated by a Playwright e2e suite covering 15+ user flows.

School Of Research Science

Dubai, UAE

Product Engineer

Aug 2023 – Jan 2026

- Designed a **BYOK** (Bring Your Own Key) architecture enabling **600+ users** to connect personal LLM API keys (Next.js, Node.js), eliminating platform inference costs by routing completions through user-managed credentials.
- Cut release cycles by **50%** (10 to 5 days) and doubled test coverage to **80%** via GitHub Actions CI, Jest, and Nginx canary rollouts across a 3-engineer team.
- Reduced ML latency by **70%** (2s to 600 ms) and saved **GBP 6K/year** by migrating to client-side TensorFlow.js, optimised for low-spec school iPads under limited-RAM Safari and high-latency Wi-Fi.
- Improved PR review turnaround by **63%** (48 h to 18 h) by introducing automated linting, 400-line PR size limits, and review SLAs strengthening release predictability across the team.

Independent Contractor

London, UK

Full Stack Software Engineer (Clients: D2C & Media)

Jun 2020 – Aug 2023

- Architected and deployed a Next.js/PostgreSQL e-commerce platform processing **2,000+ monthly transactions** via Stripe webhooks, sustaining **99.99% uptime** and zero payment data loss incidents across 18 months of production operation.
- Engineered a Node.js/Express API gateway with Redis rate limiting and role-based access control (RBAC), reducing API response latency to under 40 ms in high-traffic production through JWT optimisation and Neon serverless database branching.
- Delivered a **WCAG-compliant React component library** (30+ components) with Storybook and shared design tokens, cutting frontend delivery time by **33%** and eliminating cross-project UI regressions.

Adaptive

London, UK

Software Engineer Intern

Aug 2019 – Dec 2019

- Reduced data retrieval latency by ~40% for institutional analyst teams by engineering automated Python/SQL ingestion pipelines across equities, FX, and fixed income datasets, cutting daily reporting cycle time and enabling faster time-to-insight.

EDUCATION

- **King's College London** | BSc (Hons) Computer Science Sep 2017 – Jun 2020
- **King's College London** | PGCE Computer Science with (QTS) Sep 2021 – Jun 2022

SKILLS

Languages & Frameworks: TypeScript, JavaScript, SQL, React, Next.js, Node.js, Tailwind CSS

Systems & Infrastructure: PostgreSQL, BigQuery, Docker, Nginx, GitHub Actions, Jest, Playwright
